

**100% RECYCLED**

# THE GREEN ALTERNATIVE FOR YOUR GARDEN

**Peat free compost that makes  
an ideal soil improver and  
conditioner**

Fully composted green waste material makes an ideal soil improver and conditioner. And because it's made wholly from composted material, it's peat free, 100% recycled, totally environmentally friendly – and competitively priced too.

At NEWS, we take green garden waste from doorstep collections and from household waste recycling centres, shred it and then put it through a controlled and highly efficient composting process – nothing added, nothing taken away and definitely no chemicals.

And now it's available by the bag or by the tonne from:

**Norfolk Environmental Waste Services**  
Mayton Wood Landfill Site  
Little Hautbois Road (off B1354)  
Coltishall, Norwich
