ROLL-ON-OFF

NEWS' roll-on-off containers are designed for the containment of bulky, dry, non-hazardous waste materials. The containers are removed from site for emptying and are suitable for regular collections of bulky commercial waste and for one-off clearances of demolition or garden waste.

Fully enclosed containers are also available for use in conjunction with a static compaction machine. This offers the producers of regular, large volumes of dry compactable waste an effective, secure and efficient method of on-site waste containment - and the benefit of a tidy, waste-free site.

Roll-on-off containers are emptied as frequently as required by the customer.

- flexible delivery and collection service
- containers to suit customers' requirements
- open top and enclosed compactor options
- space efficient
- very strong container construction
- easily accessible through rear doors and open top
- high level of personal service and customer support
- "Duty of Care" compliance

ROLL-ON-OFF

Dimensions
